

FA-ST Filter Cartridges

2088PP Super Duty Polypropylene Filter Cartridge – For Filtering Coolants & Glycols

The 2088PP are designed to allow water to pass through the filter cartridge well having a dirt retention capacity. Made from Polypropylene these filters have not water retention capabilities, making these filters the ideal cartridge for providing filtration on emulsified fluids such as **Glycol & Coolant**.

Dirt retention capacity:

- **Particulate Contamination:** 2.5Kg approx.
- **Water Removal:** None

Size: Diameter: 198mm Height: 105mm

Housing: The 2088PP filter cartridge fits the **9788 / 9788H / 9788UMZ Super Duty** Filter Housing. The most common used by FA-ST fitted to most of our **Single Unit / Twin Unit / Four Unit / Eight Unit** Filtration Systems.

Used for tanks up to 300 gallons/ 1360 litres. Made from polypropylene filter media and a 1-micron 2mm base layer and with handles. **For filtration** of coolants, glycols, flame retardant oils or any water-based fluid to remove particulate contamination.
